Nermine Obeid

Full Stack Developer

Profile

With 4 years of hands-on experience in full stack development, I specialize in building robust, scalable web applications that drive business success. My expertise spans both front-end and back-end technologies, including JavaScript frameworks (React, Next), server-side languages (Node.js, Laravel), and database management (mySQL). I'm passionate about creating intuitive user experiences and developing efficient, maintainable code. I thrive in collaborative environments where innovative problem-solving is key, and I'm always eager to explore the latest technologies and best practices in software development.

EXPERIENCE

Senior Web developer (January 2023 – Present)

Compu-Vision s.a.r.l – Lebanon, Batroun

- Design and develop RESTful APIs to support various application functionalities and ensure seamless integration with frontend components.
- Integrate third-party APIs to extend application capabilities and provide additional services to users.
- Implement and manage payment gateways to facilitate secure and reliable online transactions.
- Optimize code for performance and efficiency, including minimizing HTTP requests and optimizing images.
- Version Control: Utilize Git for version control, including branching, merging, and creating pull requests to manage and collaborate on the codebase.

Full Stack Junior Developer (November 2022 – December 2022)

Petrikor Solutions - Lebanon, Tripoli

- Collaborate effectively with designers, SEO specialists, and SEM specialists to develop sustainable and responsive web projects.
- Optimize code for performance and efficiency, including minimizing HTTP requests and optimizing images.
- Translate design assets from tools like Figma, Adobe Illustrator, or Adobe XD into functional web pages, ensuring accuracy and attention to detail.
- Implement SEO best practices in the code, such as using proper headings, meta tags, and semantic HTML to enhance site visibility.
- Integrate Google Analytics to track site performance and user behavior, aiding in data-driven decision-making for SEO and SEM strategies.

Internship as Full Stack Junior Developer (July 2020 – October 2020)

Petrikor Solutions - Lebanon, Tripoli

- Collaborate effectively with designers to develop sustainable and responsive web projects.
- Implement responsive design techniques to ensure projects are accessible and user-friendly across various devices and screen sizes.
